

Gmail setting:

Due to the limit of gmail, when you login the gmail in the third party client, it will ask the user to create an App password for gmail, then use the App password as gmail password to login. Please follow below to create the App password for gmail:

Input www.gmail.com in Google browser, enter your Gmail account, click profile ---- click Account(image 1) then click Sign-in&Security to create App password(image 2).

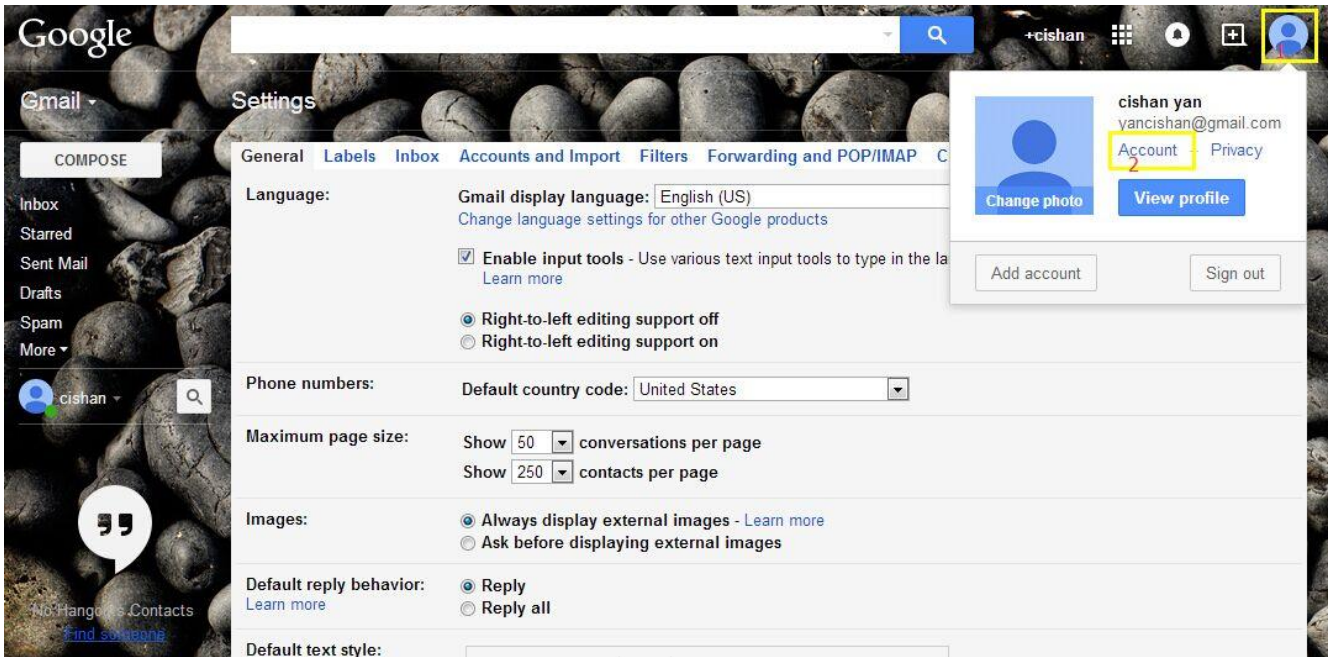

Image 1

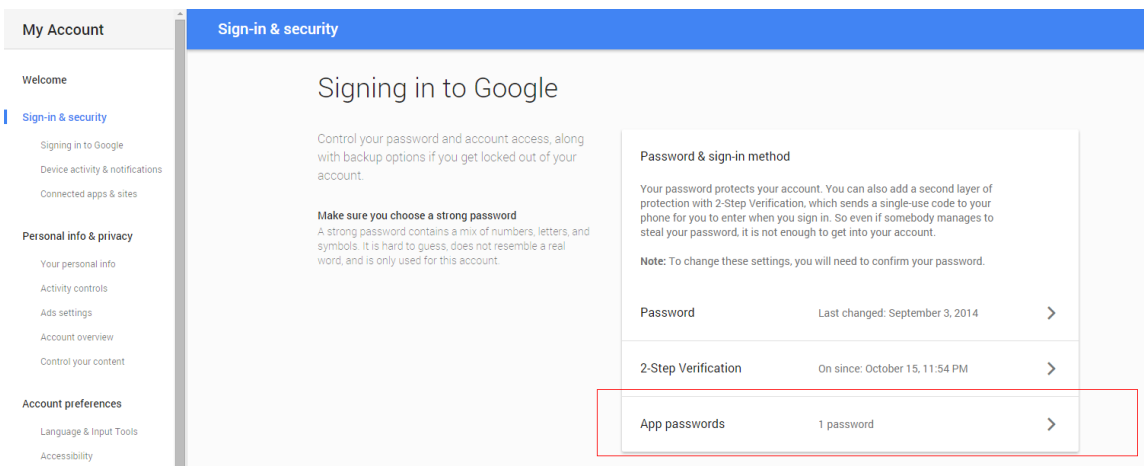

Image 2

Noted: must do 2 steps verification (2-Step Verification and App passwords), after done the 2-Step Verification, then click App passwords , go to App passwords screen, select device(image 3) ---- click GENERATE, then you will get a password “masw ajdf edeo esgl” , which is for your App password (image 4).
