

How To Change the Password of IP Camera

There are two ways to change the Password:

1, Log on to the camera's web interface to change the Password, please see below images:

Click Setup --- Security --- User ----- click admin, it will be blue ----- click Modify ---- change the password, click save.

The screenshot displays the WansView web interface for user management. On the left, the 'Device Configuration' menu is expanded, with 'Security' selected. The 'User' tab is active at the top. A table lists the 'admin' user with a masked password and 'Administrator' authorization. The 'Modify' button is highlighted in the bottom right.

Username	Password	User authorization
admin	•••••	Administrator
