

The guide of adding Wansview IP camera to iSpy

Version 6.5.3.0

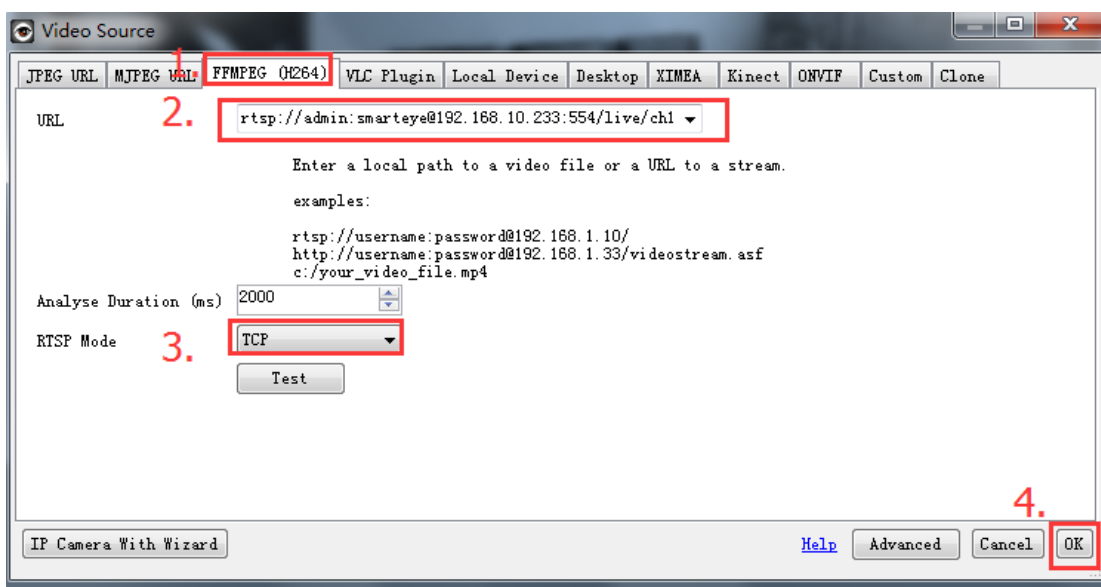

1. Launch the iSpy on computer, then click menu bar Add and select IP camera.

2. You will get a dialog for video source, please select FFmpeg(H2.264) to add camera, like below:

URL: Please enter RTSP link, `rtsp://user:password@IP:rtsp port/live/ch0(chn1 or chn2)`

RTSP Mode: please select TCP, then click Test, if you get message Ok, that's to say add you can add this camera.

3. After clicking ok you will get a dialog for editing camera, you don't have to enter any parameters, click finish to view the camera.
